surface finishes.

AXZO[®]
PLAST
PVC LAMINATES

At Axzoplast, we specialize in providing high-quality premium PVC laminate solutions that elevate both aesthetics and functionality. Our commitment to innovation and durability ensures that our products meet the diverse needs of various industries, from interior design to commercial applications. With state-of-the-art manufacturing processes and a dedicated team of experts, we guarantee superior performance and longevity in every sheet. Axzoplast's PVC laminates are not only visually stunning but also engineered to withstand the test of time.

Our mission at Axzoplast is to transform spaces with our versatile and eco-friendly PVC laminates, offering endless design possibilities. We pride ourselves on our customer-centric approach, working closely with clients to understand their unique requirements and **Deliver Tailored Solutions.** With a wide range of colors, textures, and finishes, our products inspire creativity and innovation in any project. Choose Axzoplast for a reliable partner in enhancing your design vision with premium quality and exceptional service.

TECHNICAL STANDARDS

LAMINATE & LINER

- Pasted Laminate Thickness: 1.25 mm (0.10mm) Available in 1 mm to 3 mm thickness on order.
- Liner Thickness: 0.72/0.82/0.92 mm (±0.05 mm)
- Standard Sheet Size: 1220mm X 2440 mm.
- Sheet Options: Any length can be provided on order.

Adhesive

These laminates are easy to apply with the standard laminating system, including most of the conventional water and solvent-based adhesives normally used with plastic laminates, We DO NOT recommend the use of heat activated adhesives.

Lamination

The lamination is a simple process if carried out with precision. To get a perfect lamination, make sure the substrate surface is free of any dust particles, wax, plywood chips and other elements that might disturb the bonding and lamination process. Application of external coatings like PU base, lamination wax and others can hamper the quality of our product and hence it is not recommended to use them.

Maintenance

Any cleaning agent containing acids, alkalis or abrasive should NOT be used to clean the laminate. Exposure to sunlight should be avoided as it may fade colors.

Warranty

We believe in perfection and ensure our products are free from any manufacturing defects and issues. You should inspect the products prior to their installation, and any liability should be the extent of the cost of the product itself.

Protective Film

Kindly remove the protective film within 7 days of the installation of Laminates

Cautions

- Extra care is required during vertical pasting of laminate sheets as there is a possibility of formation of air bubbles due to lack of uniform pressure.
- Avoid direct sunlight, this may cause color fading.
- Cracking at corners may be caused by poor planning, packing, improper transportation conditioning. Avoid all these to prevent it from cracking.
- Do not use chemicals for cleaning.
- Actual sheet colour may vary than given sample.
